

Speedwell Settlement Services

Independent, Accurate, and Reliable

Meteorological data is more complicated than most people expect. It is important to be aware of the complexities of these datasets. Data formatting, documentation, revision schedules, quality control (filling of missing values / detecting and replacing erroneous observations), data independence, and data publication are only a few of the factors one must consider.

Speedwell Settlement Services is in the business of managing and **simplifying** the Settlement Data process. The Speedwell Group has been providing weather data to the weather risk management industry since 2005. We are pleased to have been voted Environmental Finance Magazine's "Best Global Weather Risk Management Advisory / Data Service" for eleven consecutive years.

Simplifying Settlement Data

Speedwell Settlement Services handles the processing and delivery of data for your weather risk transaction.

Clear Documentation

A one-page summary describing the source of the data, the data processing method, and the data publication schedule is provided.

Independent Data Processing

Data is sourced from National Meteorological Services (NOAA, UK Met, DWD, ect...)

Data Quality Control

Datasets are processed to fill missing values and detect and replace erroneous observations. Standard and custom methodologies are available.

Reliable Data Delivery

Daily data updates are provided throughout the transaction.

Certified Weather Observations

Legally binding Settlement Certificates are issued on a frequent basis for the settlement of transactions.

**Speedwell Settlement Services Ltd is registered as a Benchmark Administrator under the EU benchmark regulation (Regulation (EU) 2016/1011)*
